

DRIVEN SOFTWARE

Git Training Course

Driven's Git Training Course is a practical, hands-on training program split into two morning sessions, of five hours each...

SESSION ONE : USE

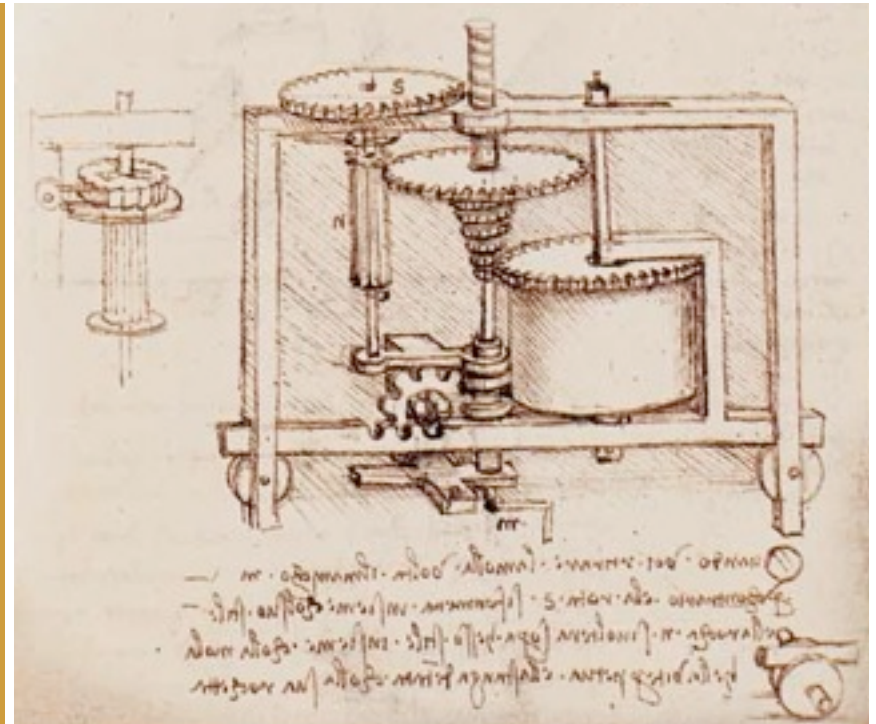

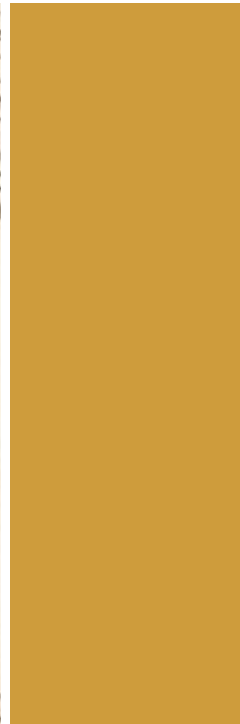

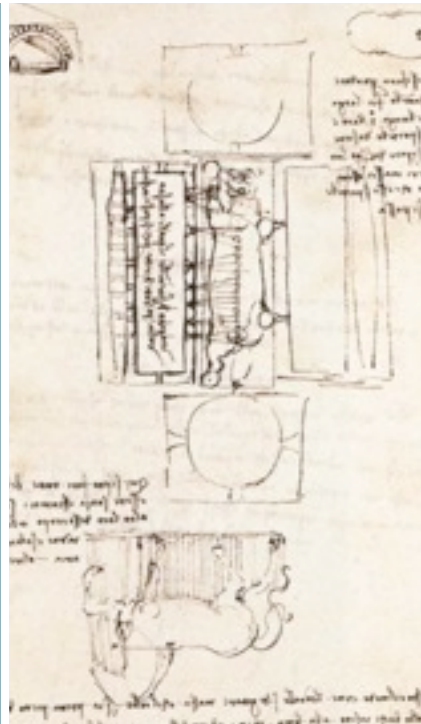

At the end of session one attendees will understand the major features of Git and have the knowledge to use it effectively.

SESSION TWO : ADOPT

At the end of the second session attendees will be able to use Git at a more advanced level.

They will know how to transition to Git from other version control systems, integrate it with external applications as well as how to adapt their team process to best leverage it.

(Session Two is typically run two weeks after Session One and attendance is optional)

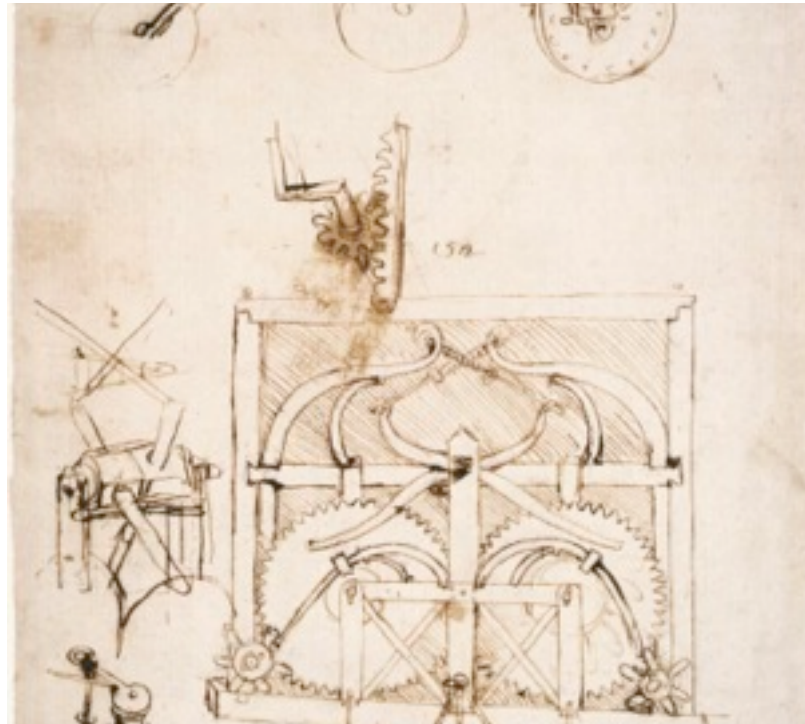

DRIVEN SOFTWARE TRAINING

Johannesburg, South Africa. training@drivensoftware.com

Driven Software's training programs are immersive, hands-on, interactive experiences.

Git is a cross-platform, distributed version control system. It is often the best fit for teams that work in an Agile/Iterative environment.
